This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional):

- **Least Privilege & Role-Based Access:** Implement a strict user hierarchy and Role-Based Access Control (RBAC) to separate duties and restrict sensitive access to authorized personnel only.
- **Disaster Recovery & Data Backups:** Develop a comprehensive Business Continuity and Disaster Recovery (BCDR) plan, including regular, automated off-site backups to ensure rapid data restoration after a breach or system failure.
- **Strong Password & Authentication Policies:** Implement centralized password management, enforce strict password policies/guidelines, and mandate Multi-Factor Authentication (MFA) across all systems.
- **Network Monitoring:** Deploy an Intrusion Detection System (IDS) to monitor network traffic for suspicious activity and potential security threats in real time.

- **Security Staffing & Compliance Training:** Hire specialized IT security personnel (or a Security Operations Center / SOC team) and conduct staff training to implement end-to-end encryption, maintain compliance with **PCI DSS** for payment processing, and align with **GDPR** regulations for handling European Union customer data.
